You will save even more! It is our mission to make training available to you close to home. Our Average Savings Calculation does not include savings in travel expense for courses taken closer to home or the savings you get from reducing course length (reduced time away from work and reduced hotel for shorter courses) by focusing the material on what you need to know and eliminating waste. We are dedicated to creating the best savings options. Please let us know how we might alter our current programs or create new programs to serve you better. Thank you for training with us!
